

## **Euronet Launches ATM Recharge Service for Centertel Mobile Subscribers**

### **Partnership Brings New Level of Convenience to Joint Customers**

Leawood, KS and Warsaw, Poland – November 15, 2000 — Euronet Worldwide (Nasdaq: EEFT), a leading provider of secure financial transaction solutions, today announced the availability of its ATM ReCharge service for customers of Centertel's pre-paid GSM service in Poland. Euronet ATM ReCharge enables Centertel's IDEA customers to automatically add minutes to their pre-paid mobile phone accounts online at approximately 450 Euronet ATMs in Poland.

With this ATM transaction option, Euronet offers added convenience to Centertel's IDEA customers who regularly purchase pre-paid airtime. Now customers may automatically add minutes to their pre-paid phone accounts at any Euronet ATM throughout the country 24 hours a day, 7 days a week. After authorizing and processing the transaction, the ATM triggers an electronic credit to the subscriber's pre-paid account. The subscriber's mobile phone then receives an SMS message from Centertel confirming that the account has been credited.

Centertel is now the fifth GSM customer in Central Europe using the Euronet ATM ReCharge service for pre-paid subscribers, and the second such customer in Poland. This partnership is the first to offer the Euronet ATM ReCharge via an on-line connection rather than through voucher

purchases. Euronet ATM ReCharge is already available at Euronet ATMs in Poland, Hungary, the Czech Republic, and Croatia for customers of ERA GSM, Pannon GSM, EuroTel, and VIPnet, respectively. Currently, this is the most advanced and sophisticated method of pre-payment for mobile phone recharging in the world.

"We were impressed with this innovative service offered by Euronet and the speed with which they implemented this solution for our customers," said Wojciech Łukawski, Deputy Marketing Director Marketing Planning & Business Development of Centertel. "Our POP subscribers will benefit from being able to perform convenient, immediate recharges of their pre-paid phone accounts, and our company will save on production and distribution costs."

"With Centertel, Euronet has taken customer service for the fast growing wireless industry to a new level. The widespread success of similar programs across Europe has demonstrated great potential for the exploding wireless market in the U.S. as well," said Michael Brown, Chairman and CEO of Euronet Worldwide. "This innovative service adds spontaneity to the pre-payment decision and allows Centertel IDEA subscribers to combine the tasks of purchasing added airtime and withdrawing cash all at the ATM."

#### About Centertel

PTK Centertel, a limited liability company, is the operator of two mobile phone networks in Poland: the analogue NMT450i with 140,000 users and the digital Idea with almost 1.350,000 users.
